Premier Fog Effects Generator

The Premier Fog Effects Generator featuring DMX control with RDM functionality driven by DFD Technology. The Powder Coated Stainless Steel Chassis is manufactured to hold 4L/1 Gallon Jug of Ultratec's Genuine Fog Fluid. Featured with a large top grab comfortable handle, a detail often overlooked. The Premier Fog Effects Generator is built with Ultratec's Award Winning Rapid-Change Technology with heating capacity of 1400 watts. The Dual Processor Design with precision temperature control featuring, ice-point reference and isolated thermocouple allows for Continuous Flow Output.

The LED Displays and Indicators allow ease of use for the operator, no more broken DMX buttons or strained eyes. There are 3 modes of Operation Control "Stand-Alone" to "Analog Remote" or "Ultimately to DMX-RDM data". The Premier Fog Effects Generator comes equipped with a 25' Hand Held Timer Remote which can be extended with optional cables. Complete with a 4" Hose Adapter is a standard feature and can be easily removed for custom installations.

Best in class product with great value, the Premier Fog Effects Generator of choice for all your special effects needs.
