Programmable Functions

**Color System:**
A three-filter CYM cross-fading mechanism. A fixed color wheel with six interchangeable color filters and continuous wheel rotation for additional effects. It includes a variable CTO color temperature correction filter.

**Zoom Optics:**
A 13-element 6:1 zoom optics system, covering a range from 10° to 60°.

**Shutter Control:**
A four-blade shutter mechanism that allows the blades to be operated independently or in unison on two planes for a clear and crisp image. The entire mechanism can rotate 50° in either direction.

**Intensity Control:**
Full field dimming designed for smooth timed fades as well as quick dimming effects.

**Strobe:**
High-performance dual blade strobe system capable of ultra-fast operation.

**Rotating Gobo Wheels:**
One gobo/effects wheel provides five rotatable, indexable gobo positions and one open position.

**Fixed Gobo Wheel:**
One fixed gobo/effects wheel provides six positions for standard or custom gobos and one open position.

**Edge and Pattern Focus:**
Variable beam focus to soften edges of gobos or spots. Remarkable depth of field capability allows morphing effects between all pattern and effects wheels.

**Pan and Tilt:**
Smooth, time-controlled continuous motion by way of three-phase stepper motor systems.

**Range:**
Pan - 540°, Tilt - 270°.

**Accuracy:**
0.3° resolution.

Description

Source:
1200W Short Arc Lamp
Color Temperature: 6000K
CRI: 85

Fixture Output:
20,000 lumens.

Power Requirements:
Standard AC power distribution from 200– 264 VAC, 50/60 HZ. The unit requires 7 to 12 A depending on the AC supply voltage.

Reflector:
Precision glass reflector system with dichroic cold mirror coating.

Operational Temperature:
-20° to 122°F (-29° to 50°C).

Cooling:
Forced air cooling.

Control:
Completely compatible with a wide variety of DMX512 consoles.

DMX Channels:
31

Mounting Position:
The VL3500 Spot luminaire can be mounted and operated in any orientation.

Spacing:
Hangs on 26 in. (66 cm) centers.

Weight:
91 lbs (41 kg).

Ordering Information

**Luminaires:**
20.9678.0019  VL3500 Spot Luminaire, Black, Includes 1200W Short Arc Lamp

**Accessories:**
1200W Short Arc Lamp
Safety Cable Assembly
USB Luminaire Programming Kit
Truss Hook, Mega-Clamp (For round and square pipe)
Truss Hook, Mega-Claw (For 2” round pipe)
AC Input Cable, PowerCon with Bare End (no connector), 1 Meter
AC Input Cable, PowerCon with Twist Lock (Male), 250V, 1 Meter
Specifications

The unit is an integrally designed, remote-controlled, motorized spot luminaire. The head, yoke and enclosure housings are constructed of aluminum alloy for light weight, strength and durability. Low-noise fans provide forced-air cooling for internal components. The rear cap is hinged, providing easy access to the lamp for replacement.

A single AC input PowerCon connection along with two, five-pin DMX512 compatible connectors (in and through) are provided. The unit can be controlled from a wide variety of DMX512 consoles.

Each unit is equipped with an on-board processor providing diagnostic and self-calibration functions as well as internal test routines and software update capabilities.

The unit contains two independent three-phase stepper motors to provide movement of the head through 540° in the horizontal plane (pan) and 270° in the vertical plane (tilt). The pan and tilt mechanisms are belt-driven, providing positional resolution and repeatability of 0.3° on either axis.

A 6:1 zoom optics system adjusts the projected field angle over a range of 10° to 60°. Variable beam focus is provided to soften the edges of gobos or spots and to provide gobo morphing. The projected image remains in focus throughout the entire zoom range.

The unit contains a CYM color mixing system, as well as variable CTO color temperature correction.

The fixture’s shutter mechanism is comprised of four frame blades that move independently or in unison on two planes for a crisp, sharp image. The entire assembly operates in a smooth, time-continuous motion using stepper motors (two per frame blade and one for the entire mechanism). The shutter mechanism can rotate 50° in either direction and the frame blades can tilt +/- 30°.

One fixed color filter wheel is included. The color wheel holds six interchangeable dichroic colors to allow for custom configurations. The unit comes equipped with a standard palette of dichroic color filters. (Custom colors are available from Vari-Lite.)

Each luminaire has two gobo/effects wheels. One is a six-position rotating gobo wheel containing individually rotating, indexable gobos and patterned glass effects. One position on this wheel is open. A second gobo effects wheel is a seven position, fixed wheel and accepts six gobos with one position open. Each gobo/effects wheel is such that allows customization of the unit. The unit comes equipped with a standard set of gobos and effects. (A wide selection of colored and patterned gobos and effects is available from Vari-Lite.)

The unit contains a patterned glass dimmer wheel that provides full field dimming and allows for smooth timed fades and fast blackouts.

A dual blade strobe and dousing system provides variable strobe effects capable of rapid operation.

The unit shall be ETL and ETLC certified and CE-marked. Exterior finish is black.

1 Multiply distance by TN to determine coverage.
To calculate center beam illuminance (I), at a specific distance (D); I = cd / D^2
— if (D) is in feet, (I) is in foot candles
— if (D) is in meters, (I) is in lux
* Note: All data taken with seasoned light source at 20 hours of life. Fixture output = 20,000 lumens.
